BUNDLING PROFITS

## Online / Retail Supplier List

What you need to know. Buying in bulk to sell with Amazon FBA or Merchant fulfilled on any other platform does have risks. Therefore, it is very important if you have never purchased from the supplier/store to start with a small order. Once you receive the products, inspect them for quality issues. If there is something not right contact the supplier immediately. The reason I recommend this is return issues on any eCommerce platform. The higher the quality the less chance your customer will return the items and buy from you again in the future.
